Welcome, Dottir!

BPCI Advanced is a voluntary episode payment model that will test retrospective bundled payments for clinical episodes and align incentives for reducing costs with those for improving coordination and quality of care under a single payment and risk track. The period of performance for this model will begin on October 1, 2018 and end on December 31, 2023.

BPCI Advanced has the following objectives:

1. *Care Redesign*: Support and encourage Participants, Participating Practitioners, and Episode Initiators who are interested in continuously re-engineering care.
2. *Data Analysis and Feedback*: Decrease the cost of a Clinical Episode by eliminating unnecessary or low-value care, increasing care coordination, and fostering quality improvement.
3. *Financial Accountability*: Test a payment model that creates extended financial accountability for the outcomes of improved quality and reduced spending, in the context of acute and chronic episodes of care.
4. *Health Care Provider Engagement*: Create environments that stimulate rapid development of new evidence-based knowledge.
5. *Patient Engagement*: Increase the likelihood of better health at lower costs through patient education and ongoing communication throughout the Clinical Episode.
