

## **Appendix A** for LCD Independent Diagnostic Testing Facilities (IDTFs)

### **Contractor's Determination Number**

PHYS-078

Section 135(a) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) amended section 1834(e) of the Social Security Act and required the Secretary to designate organizations to accredit suppliers, including but not limited to physicians, non-physician practitioners and Independent Diagnostic Testing Facilities, that furnish the technical component (TC) of advanced diagnostic imaging services.

MIPPA specifically defines advanced diagnostic imaging procedures as including diagnostic magnetic resonance imaging (MRI), computed tomography (CT), and nuclear medicine imaging such as positron emission tomography (PET). In order to furnish the TC of advanced diagnostic imaging services for Medicare beneficiaries, suppliers must be accredited by January 1, 2012.

The Centers for Medicare & Medicaid Services (CMS) approved three national accreditation organizations – the American College of Radiology, the Intersocietal Accreditation Commission, and The Joint Commission - to provide accreditation services for suppliers of the TC of advanced diagnostic imaging procedures. The accreditation will apply only to the suppliers of the images themselves, and not to the physician's interpretation of the image. All accreditation organizations have quality standards that address the safety of the equipment as well as the safety of the patients and staff. To obtain additional information about the accreditation process, please contact the accreditation organizations shown below.

American College of Radiology (ACR)  
1891 Preston White Drive  
Reston, VA 20191-4326

National credentialing bodies must be a member of the National Organization for Competency Assurance (NOCA) or certified by the Commission for Certifying Agencies (NCCA) which is the accreditation body of NOCA. In the absence of a National Credentialing Body, the Carrier has the discretion to approve educational requirements or other certifications. For example, we are allowing technicians who are certified by Cardiovascular Credentialing International (CCI) for cardiac monitoring services since there is no agency for those services that is recognized by NOCA or NCCA.

Supervising physicians must be board eligible or board certified. An IDTF wishing to add a supervising physician to their file that is not of the specialty listed in the appendix may send in

additional information outlining their qualifications such as additional training or education to the enrollment department. The information will be reviewed by the medical staff.

**Supplies:**

Certain items (e.g., radiopharmaceutical agents, special contrast agents, medications, etc.) or services that are necessary for the performance of specific diagnostic tests may also be billed by an IDTF if approval is granted by the Carrier for the IDTF to bill for the specific test(s) that require such items/services. The items or services may not be listed on the table. For example, some procedures require an injection of a joint for arthrography and would be allowed if the procedure is integral to the diagnostic test the IDTF is permitted to perform.

At the time that the IDTF requests Carrier approval to perform the tests, the IDTF must identify all such items/services that it intends to bill in conjunction with specific tests. Each IDTF will have a specific and unique list of HCPCS codes for which it can be paid by the Carrier, and it is the responsibility of the IDTF to obtain specific Carrier approval to bill each HCPCS code that it intends to bill.

The Carrier will not allow payment to an IDTF for services or items that the IDTF has not been approved to bill. (Example: An IDTF that is not approved to perform nuclear medicine studies could not be paid for the provision of diagnostic radiopharmaceuticals CPT Code 78990)

The procedures listed below are for the physician supervision and technician requirements and does not imply coverage of the procedure. All of the procedure codes are subject to Medicare rules and regulations, applicable Local Coverage Decisions (LCD's), and medical necessity. G0389 is subject to the coverage criteria outlined in the internet only manual (IOM) 100-04 section 110 which states in part that the test be a referral as the result of an initial preventive physical examination and the beneficiary have at least one risk factor in order for the service to be covered by Medicare. Procedures listed on the Medicare Physician Fee Schedule Database with an N indicator will be denied as not covered, i.e. 74263.

Unlisted procedure codes are not included in the table below. Providers will need to send in a written request explaining the procedure they are performing. If the CMD determines it to be an appropriate diagnostic procedure that can be safely performed in an IDTF, it will be added to the provider's file.

A procedure code that includes a diagnostic and therapeutic procedure may be allowed in an IDTF provided the service performed is diagnostic.

The numeric diagnostic supervision levels assigned to each CPT or HCPC's code are found on the Medicare Physician Fee Schedule Database (MPFSDB) on the Centers for Medicare & Medicaid Services (CMS) website: <http://www.cms.hhs.gov/providers/pufdownload/rvudown.asp>

- 1 *Procedure must be performed under the general supervision of a physician.*
- 2 *Procedure must be performed under the direct supervision of a physician.*
- 3 *Procedure must be performed under the personal supervision of a physician.*

The level of supervision listed on the database must be provided by one of the physicians listed as a supervising physician in the table below.

Abbreviations are listed at the end of the table

These are abbreviated code descriptions of the procedures that may be allowed in an IDTF. Providers should consult a CPT book for the complete code description of the procedures they are performing/billing.

<b>CPT/ HCPCS Codes</b>	<b>Description</b>	<b>Supervising physician Qualification Requirements</b>	<b>Technician Qualification</b>
70010	Contrast x-ray of brain	Radiologist	Physician Only Service
70015	Contrast x-ray of brain	Radiologist	Physician Only Service
70030	X-ray eye for foreign body	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70100	X-ray exam of jaw	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70110	X-ray exam of jaw	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70120	X-ray exam of mastoids	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70130	X-ray exam of mastoids	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70134	X-ray exam of middle ear	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
70140	X-ray exam of facial bones	Radiologist	Certified Radiologic Technologist (ARRT:R.T.-R)
