09102 – Florida
09202 – Puerto Rico
09302 – Virgin Islands

LCD Title

Independent Diagnostic Testing Facility (IDTF)

Coding Guidelines**Desk and Site Reviews**

All new IDTF applications shall receive (1) a thorough desk review, and (2) a mandatory site review prior to the carrier's enrollment of the applicant and issuance of a billing number. The general purpose of both reviews is to determine whether the information listed on Attachment 2 of the CMS-855B is correct, verifiable, and in accordance with IDTF regulatory and manual requirements.

Site Visits for Mobile Units and Electronic Monitoring Services

Mobile units are required to list their geographic service area. They can be site visited by the following methods: 1) The mobile unit may visit the office of the site reviewer, or 2) The site reviewer can obtain an advance schedule of the locations the IDTF will be visiting and conduct the site visit at one of those locations.

Transtelephonic and electronic monitoring services (e.g., 24-hour ambulatory EKG monitoring; pacemaker monitoring and cardiac event detection) should be classified as IDTFs and must meet all IDTF requirements. These entities require a supervisory physician who performs general supervision. Final enrollment of a transtelephonic or electronic monitoring service as an IDTF requires a site visit.

Interpreting Physicians

An Independent Diagnostic Testing Facility (IDTF) is not restricted to billing only the technical component of diagnostic services. In certain situations, an IDTF can bill for both the technical component of the diagnostic test and interpretative services. This approach is referred to as billing "globally". The interpretative services must be performed by a licensed practitioner who is allowed to perform the service.

A Form CMS-855R need not accompany a Form CMS-855B application submitted by an independent diagnostic testing facility (IDTF) that employs or contracts with an interpreting physician.

Independent Diagnostic Testing Facility (IDTF).3_code guide
Per the Pub.100-08 PIM, Chapter 15.5.19.3:

The IDTF applicant shall list all physicians for whose diagnostic test interpretations it will bill. This includes physicians who will provide interpretations subject to the anti-markup payment limitation as detailed in CMS Publication 100-04, chapter 1, [§ 30.2.9](#) - whether the service is provided to the IDTF on a contract basis or is reassigned.

The Contractor Shall Ensure and document that:

All physicians listed are enrolled in Medicare.

All interpreting physicians who are reassigned their benefits to the IDTF have the right to do so.

The interpreting physicians listed are qualified to interpret the types of tests (codes) listed. In accordance with this CMS requirement (CMS Manual System, Pub. 100-08, Medicare Program Integrity Manual, Chapter 10, Section 4.19.3), that the interpreting physician for a test billed by the IDTF meet the same qualification requirements as the supervising physician for that IDTF test as listed in the 'Credentialing Matrix'.

Note: The applicant cannot bill globally for interpreting physicians not listed.

If an interpreting physician has been recently added or changed, the new interpreting physician must have met all of the interpreting physician requirements at the time any tests were performed.

Off-Site Interpretations

If an IDTF wants to bill for an interpretation performed by an independent practitioner off the premises of the IDTF, it must meet all instructions identified in the CMS Manual System, Pub 100-4, Medical Claims Processing Manual, Chapter 1, concerning purchased interpretations. In this scenario, there is no reassignment of benefits because the purchaser of the test is also considered the supplier of the test.

When the technical component of a test is performed by the IDTF and the interpreting practitioner is the practitioner who ordered the test, the IDTF cannot bill for the interpretation. The interpreting practitioner must bill the interpretation since the IDTF cannot bill the interpretation when the interpreting physician is the referring physician.

Purchased Diagnostic Tests and Jurisdictional Pricing

Services that are reimbursed under the Medicare Physician Fee Schedule (MPFS) are reimbursed by the payment locality where the service is furnished and by the zip code. Effective for claims received on or after April 1, 2004, carriers must use the zip code of the location where the service was rendered to determine carrier jurisdiction over the claim and the correct payment locality.

When a physician, practitioner, or supplier furnishes services in payment localities that cover more than one carrier's service area (e.g., the provider has separate offices in multiple localities and/or multiple carriers), separate claims must be submitted to the appropriate carrier for processing.

Effective April 1, 2004, providers may not submit a global billing code on paper or electronic claims when one component of the service has been purchased. Only one service facility location (name, address and zip code) can be indicated in item 32 on the CMS-1500 form. Claims received with global services will be returned as unprocessable.

Effective January 25, 2005, suppliers (including laboratories, physicians and independent diagnostic testing facilities [IDTFs]) must bill their local carrier for all purchased diagnostic tests/interpretations, regardless of the location where the purchased service was rendered.

Purchased Technical Components

A physician may bill for the technical component of a diagnostic test that he/she purchased from another physician, medical group or supplier. However, in order to purchase a diagnostic test from another physician, medical group, or supplier, the purchaser must perform the interpretation (professional component). Additionally, the physician or supplier that furnished the technical component must be enrolled in the Medicare program.

Purchased Interpretations

A person or entity that provides diagnostic tests may submit the claim, and (if assignment is accepted) receive the Part B payment, for diagnostic test interpretations which that person or entity purchases from an independent physician or medical group if:

The tests are initiated by a physician or medical group which is independent of the person or entity providing the tests and of the physician or medical group providing the interpretations;

The physician or medical group providing the interpretations does not see the patient; and

The purchaser (or employee, partner, or owner of the purchaser) performs the technical component of the test. The interpreting physician must be enrolled in the Medicare program. No formal reassignment is necessary.

The purchaser must keep on file the name, the provider identification number and address of the interpreting physician.

Note: This does not remove the requirement that when an entity either purchases an interpretation or a test, they must perform the other component in order to be paid for the purchased component.

In order to price claims correctly and apply purchase price limitations, global billing is not acceptable for claims received on the Form CMS-1500 or on the ANSI X12N 837 electronic format. Each component must be billed as a separate line item (or on a separate claim).

Effective for claims with dates of service on or after January 25, 2005, suppliers (including laboratories, physicians, and IDTFs) must submit claims for all purchased diagnostic tests/interpretations to their local carrier, regardless of the location where the purchased service was furnished.

Physician Supervision of Diagnostic Procedures

The following table reflects CMS supervision requirements, which describes the levels of physician supervision required for furnishing the technical component of diagnostic tests for Medicare beneficiaries who are not a hospital inpatient or outpatient.

Diagnostic tests covered under the physician fee schedule, with certain exceptions listed in the regulation, have to be performed under the supervision of an individual meeting the definition of a physician. Nurse practitioners, clinical nurse specialists, and physician assistants are not defined as physicians under 1861(r) of the Act. Therefore, they may not function as supervisory physicians under the diagnostic tests benefit.

01 = Procedure must be performed under the general supervision of a physician.
02 = Procedure must be performed under the direct supervision of a physician.
03 = Procedure must be performed under the personal supervision of a physician.
04 = Physician supervision policy does not apply when procedure is furnished by a qualified, independent psychologist or a clinical psychologist. Otherwise the procedure must be performed under the general supervision of a physician.
05 = Not subject to supervision when furnished personally by a qualified audiologist, physician, or non physician practitioner. Direct supervision by a physician is required for those parts of the test that may be furnished by a qualified technician when appropriate to the circumstances of the test.
06 = Procedure must be personally performed by a physician or a Physical Therapist (PT) who is certified by the American Board of Physical Therapy Specialties (ABPTS) as a qualified electrophysiological clinical specialist and is permitted to provide the procedure under State law. Procedure may also be performed by a PT with ABPTS certification without physician supervision.
21 = Procedure may be performed by a technician with certification under general supervision of a physician. Otherwise the procedure must be performed under direct supervision of a physician. Procedure may also be performed by a PT with ABPTS certification without physician supervision.
22 = May be performed by a technician with on-line real-time contact with a physician.
66 = May be personally performed by a physician or by a PT with ABPTS certification and certification in this specific procedure.
6A = Supervision standards for level 66 apply; in addition, the PT with ABPTS certification may personally supervise another PT, but only the PT with ABPTS certification may bill.
77 = Procedure must be performed by a PT with ABPTS certification (TC & PC) or by a PT without certification under direct supervision of a physician (TC & PC), or by a technician with certification under general supervision of a physician (TC only; PC always physician).

Independent Diagnostic Testing Facility (IDTF).20 _coding guidelines

7A = Supervision standards for level 77 apply; in addition, the PT with ABPTS certification may personally supervise another PT, but only the PT with ABPTS certification may bill.

09 = Concept does not apply.*

*Note: The minimal level of physician supervision, which applies to ALL diagnostic tests, with the exceptions listed in the regulation, is “general supervision.”

Services That Do Not Meet the National Electrical Manufacturers Association (NEMA) Standard XR-29-2013

Section 218(a) of the Protecting Access to Medicare Act of 2014 (PAMA) is titled “Quality Incentives To Promote Patient Safety and Public Health in Computed Tomography Diagnostic Imaging.” It amends the Social Security Act (SSA) by reducing payment for the technical component (and the technical component of the global fee) of the Physician Fee Schedule service (5 percent in 2016 and 15 percent in 2017 and subsequent years) for computed tomography (CT) services identified by CPT codes 70450-70498, 71250-71275, 72125-72133, 72191-72194, 73200-73206, 73700-73706, 74150-74178, 74261-74263, and 75571-75574 furnished using equipment that does not meet each of the attributes of the National Electrical Manufacturers Association (NEMA) Standard XR-29-2013, entitled “Standard Attributes on CT Equipment Related to Dose Optimization and Management.”

To implement this provision, the Centers for Medicare and Medicaid Services (CMS) will create modifier “CT” (Computed tomography services furnished using equipment that does not meet each of the attributes of the National Electrical Manufacturers Association (NEMA) XR-29-2013 standard). Beginning in 2016, claims for CT scans described by above-listed CPT codes (and any successor codes) that are furnished on non-NEMA Standard XR-29-2013-compliant CT scans must include modifier “CT” that will result in the applicable payment reduction.

Beginning January 1, 2016, a payment reduction of 5 percent applies to the technical component (and the technical component of the global fee) for Computed Tomography (CT) services furnished using equipment that is inconsistent with the CT equipment standard and for which payment is made under the physician fee schedule. This payment reduction becomes 15 percent for 2017 and succeeding years.

Credentialing Matrix

Revision History

Date	Revision
6/28/2016	3-Based on a reconsideration request, the coding guidelines were revised to include American Osteopathic Association (AOA) subspecialty certification. This revision is effective for claims processed on or after 6/28/2016.
02/18/2016	2-The current NCD requirements addressing patient assessment exceed the IDTF enrollment criteria of supervising physician and technician for HCPCS code G0297. Therefore, HCPCS code G0297 is being removed from the IDTF coding guideline. The effective date of this revision is for claims processed on or after 02/18/2016, for dates of service on or after 01/01/16.
01/01/2016	1- Annual 2016 HCPCS Update. CPT codes G0297, 47531, 47532, 47544, 72081, 72082, 72083, 72084, 73501, 73502, 73503, 73521, 73522, 73523, 73551, 73552, 74712, 74713, 78265, 78266, 92537, and 92538 were added. CPT codes 70373, 72010, 72069, 72090, 73500, 73510, 73520, 73530, 73540, 73550, 74305, 74320, 74327, and 92543 were deleted. In addition, the Level of Physician Supervision was revised for CPT codes 73562 and 78264. Also, based on Change Request 9250 language was added related to services that do not meet the National Electrical Manufacturers Association (NEMA) Standard. The effective date of this revision is based on date of service.
10/01/2015	This “Coding Guideline” replaces all previous “Coding Guidelines” to comply with ICD-10-CM based on Change Request 8112. The effective date of this “Coding Guideline” is based on date of service.
